

When the coronavirus outbreak was declared a national health pandemic in March 2020, we were determined to be a part of the solution. We went to work at warp-speed, applying decades of healthcare and Silicon Valley technology expertise to develop a first-of-its-kind, end-to-end COVID test orders management solution specifically designed for labs and large institutions.

Less than one year and more than 5,000,000 completed tests later, we are the leading mobile-based diagnostics cloud software that lets you quickly and seamlessly deploy and manage your entire COVID test orders workflow.

**Fast and easy  
test scheduling,  
self check-in  
and results  
notifications,  
all via phone**

# Scale delivery, reduce costs, and delight test recipients.

**5M+**

tests completed

**\$3**

**<3**

days to implement

**1000s**

of testing sites globally

## Quickly Deployable

Regardless of your operation's size and number of sites, we will take you live within days — not weeks. We configure the software to your needs, walk you through set-up, and you're ready to start testing.

## Deep Enterprise Technology Expertise

As part of a global enterprise technology group, we bring over 20 years of digital transformation know-how from prior roles in healthcare, government and other industries to solve our clients' biggest data management and customer engagement challenges.

## Secure & Compliant

We utilize the National Institute for Standards and Technology (NIST) security framework to support HIPAA, PIPEDA, GDPR and other international standards.

## Integration Ready, Ecosystem Agnostic

Our platform seamlessly integrates with multiple systems and third parties, including: EPIC and other hospital EMRs, lab information systems, fulfillment companies, billing platforms, as well as airport, civil and government systems.

<sup>1</sup> Cost savings as compared to using paper or non-specific technology

# Our flexible solution lets you customize every part of the user journey.

## Scheduling

Recipients and staff save time and avoid manual errors with fully digital scheduling, registration, patient ID and signature collection — all via the mobile app.

## Testing On-Site or At-Home

Self check-in features support on-site traffic while at-home recipients use their phone for the entire process. Your technicians use the platform to scan test orders and test kits to the lab in real-time.

## Lab Integration

We work with any lab and support all laboratory inventory management systems.

## Results

Recipients receive results in real-time according to their communication preference (text, email, or phone call). Administrators log on to the Results Portal to view results of the entire population or by drill-down preferences.

## Surveillance & Access Control

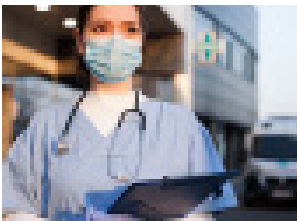

For organizations requiring repeat testing and compliance tracking, we automate the entire population management process, including group set-up, smart invites and reminders, retesting, results tracking and access control management.

# Built to address the challenges you care about most.

## For Labs

Our platform is proven to help you scale your business by replacing manual data entry with a fully automated front-end solution that works seamlessly with your LIMS, resulting in significant time and cost savings.

## For Medical Institutions

To ensure the safety of your staff and patients, compliance is vital. We take care of supporting your testing guidelines by pro-actively managing patients to schedule testing, expedites results turnaround from days to hours, and alerts staff in real-time of any positive cases.

## For Universities & Corporations

Broad testing for COVID-19 is a critical aspect to bringing your people back to work and school safely. Mitigate risk and minimize outbreaks with large-scale, flexible, repeatable testing and surveillance.

## Commitment to your success

Our end-to-end solution is designed to meet your test management needs right out-of-the-box, but if you have special customization or integration requirements, we are here for you. From 24/7 help desk to customized operations support, we offer high-touch service packages to ensure full transparency, quality, and value every step of the way.
